MoneyWorks Gold is a solid, full-featured business accounting application that is networkable, supports multiple users, and works on both Macs and PCs.. I looked at four apps for managing your business invoicing and finances: Cognito Software's, The Acclivity Group's, Intuit's, and Marketcircle's.. The first three are traditional invoicing and accounting applications, while Billings Pro offers compelling features, but also requires additional software to complete the package.. MoneyWorks offers simple access to all your business data and the options for sharing your data with Mac and PC users on your network.. While this makes all of these applications a bit more interesting visually, in practice I've rarely used the flowchart to figure out how the many aspects of a business are related.
